Per ASTM F2245-09 Minimum Useful Load for SLSA with 100 hp is 430 lb. For Skycatcher with a standard empty weight of 834 lb and a maximum ramp weight of 1324 lb (max takeoff 1320 lb) option weight must be kept under 60 lb. For final minimum useful load calculation please consult the airplane weight and balance manual.

**U.S. suggested retail price and does not include installation. Labor hours are used for reference only and is not included in price. Final option and installation pricing dependent on installation facility. Equipment weight and price subject to change without notice. Prices may vary outside of the U.S.

Import duty, import taxes or any other import fees are the responsibility of purchaser.

**Call 1-800 4 CESSNA in the U.S. or +1-316-517-6056 outside the U.S. today for
details on purchasing your new Skycatcher.**
